Sleeve Bearings | Bearings | Bearing Supplier | Technoslide Sleeve bearings may also be called bushings or journal bearings. These types of bearings are used to control and to guide, they reduce friction in linear or rotary Sleeve Bearing - an overview | ScienceDirect Topics Sleeve bearings, which are often used on fractional horsepower motors, are made from babbitt, brass, or bronze. Graphite may be impregnated into the metal to enhance the lubrication. Because the metal in these bearings is much softer than the steel shaft of the motor, the bearing will wear rather than the motor shaft
